Titel

How to solve the migration issue within the European Union

Ärendebeskrivning

We have studied different countries point of view on how to handle the migration issue in Europe and we have seen that countries have different opinions about migration.

Föreslagna åtgärder

To handle the migration issue all EU member countries have to work together with the same purpose. Our proposal is that each and every country must take the same responsibility. In front of us we see that EU develop a model where every country takes responsibility according to their size of economy and population. In our opinion this proposal creates a severally, fair and sustainable system for the migration issue
