ISSP 2015 - Work orientations IV: Sweden

ISSP 2015 - Åsikter om jobben och arbetslivet

Overview

Type	International Social Survey Programme, ISSP
Identification	SND1002-001
Version	Production Date2016-09-19 Original
Series	The International Social Survey Programme (ISSP) is a continuing annual programme of cross-national collaboration on surveys covering topics important for social science research. It brings together pre-existing national social science projects and coordinates research goals, thereby adding a cross-national, cross-cultural perspective to the individual, national studies. Formed in 1983, the group develops topical modules dealing with important areas of social science as supplements to regular national surveys. Every survey includes questions about general attitudes toward various social issues such as the legal system, sex, and the economy. Special topics have included the environment, the role of government, social inequality, social support, family and gender issues, work orientation, the impact of religious background, behaviour, and beliefs on social and political preferences, and national identity. Participating countries vary for each topical module. The merging of the data into a cross-national dataset is performed by the Zentralarchiv für Empirische Sozialforschung, University of Cologne. Currently 48 countries are members of the ISSP.

Abstract

This survey is the Swedish part of the 2015 'International Social Survey Program' (ISSP), and it is the third time an ISSP-survey is focusing on Work Orientations.

Kind of Data	Survey data: Independent surveys
